

JAYSON QUINDAO

PRINCIPAL SYSTEMS ARCHITECT • FOUNDING AI / FULL-STACK & RUST TELEMETRY ENGINEER

New York, NY & Dallas, TX (Remote / NYC / SF Onsite Ready) • (469) 371-8556 • jquindao1@icloud.com • github.com/djjrip • djrip.github.io • linkedin.com/in/jaysonquindao

EXECUTIVE ENGINEERING PROFILE

6+ years building high-throughput distributed telemetry systems, userspace security SDKs in **Rust/C++**, full-stack **TypeScript/React/Next.js** platforms, autonomous **LLM/MCP agent pipelines**, and automated financial settlement engines. Founder & Principal Systems Architect of **GG Loop LLC** (shipped open-source Rust behavioral anti-cheat SDK, sub-50ms WebSocket tournament engine, and PostgreSQL/Stripe double-entry financial ledger). Former Financial Systems & Data Automation Engineer at **NCR Atleos** (automated Python/SQL multi-currency reconciliation across national ATM banking networks, cutting settlement discrepancy cycle times by 40%).

CORE TECHNICAL STACK

Systems, Security & Telemetry: Rust (Cargo, Win32 Process/Memory Inspection, SHA-256 Binary Integrity, HMAC-SHA256 Signing), C++, Electron.js, WebSockets (Sub-50ms Streams), AWS Kinesis.

Full-Stack & Cloud Infrastructure: TypeScript, React, Next.js, Node.js, Python (FastAPI, Pandas, NumPy), PostgreSQL (Drizzle ORM, Batch Unnest Ingest, T-SQL), Docker, AWS (ECS Fargate, Lambda, RDS, S3), GitHub Actions CI/CD.

Applied AI & Agentic Workflows: Model Context Protocol (MCP) Servers, Multi-Agent Orchestration, Claude / OpenAI / Gemini APIs, Structured Output Validation, RAG Pipelines (pgvector), Autonomous Browser/OSINT Automation.

FinTech & Payment Ledgers: Double-Entry PostgreSQL Ledgers, Stripe Connect Multi-Party Payouts, Idempotent Cryptographic Webhook Verification, Multi-Million-Dollar ATM Network Settlement & Reconciliation.

PROFESSIONAL ENGINEERING EXPERIENCE

GG LOOP LLC — Founder & Principal Systems Architect **Nov 2023 – Present | New York, NY / Remote**
Stack: Rust, TypeScript, Next.js, React, Node.js, PostgreSQL (Drizzle), AWS, Stripe Connect, MCP, WebSockets *github.com/djjrip/anti-cheat-sdk*

- Open-Source Rust Anti-Cheat & Behavioral Telemetry SDK (anti-cheat-sdk):** Engineered a lightweight userspace telemetry library in Rust featuring Win32 process memory enumeration (K32GetModuleFileNameExW), SHA-256 executable hashing, sub-millisecond click/input timing entropy analysis, and HMAC-SHA256 cryptographic event signing.
- High-Throughput B2B Studio Telemetry Ingest API:** Architected multi-tenant REST & WebSocket ingestion endpoints (/api/v1/ingest, /api/v1/flags) utilizing single-roundtrip PostgreSQL unnest() bulk inserts and automated anomaly detection rules (flagging impossible input rates >25 CPS and metronomic macro variance <2ms).
- Double-Entry FinTech Ledger & Tournament Platform:** Built end-to-end competitive gaming SaaS (gg-loop-tournament.vercel.app) with ACID-compliant double-entry PostgreSQL ledgers, Stripe Connect multi-party payouts, and idempotent cryptographic webhook replay protection.
- Autonomous Multi-Agent & MCP Orchestration:** Built production Model Context Protocol (MCP) tool servers and multi-agent LLM pipelines automating real-time telemetry triage, developer workflows, and B2B lead intelligence.

NCR ATLEOS (Formerly NCR Corporation) — Financial Systems & Data Automation Engineer **Aug 2021 – Nov 2023 | Frisco, TX**
Stack: Python (Pandas, NumPy), SQL (PostgreSQL, T-SQL), Automated ETL Pipelines, Interbank Settlement Systems *Enterprise FinTech / Banking*

- Automated Financial Reconciliation Pipelines:** Architected and deployed automated Python and SQL ETL pipelines ingesting, normalizing, and reconciling multi-million-dollar daily transaction flows across national ATM and banking networks with 99.9%+ ledger accuracy.
- 40% Discrepancy Cycle-Time Reduction:** Replaced manual spreadsheet audits with automated SQL anomaly-detection scripts and Python variance engines, slashing transaction discrepancy investigation and dispute resolution times by 40%.
- National ATM Settlement & Routing Operations:** Executed monthly institutional cash payout operations and reconfigured interbank routing/account parameters across 80+ global markets and financial institution partners.

MENTALIX, INC. — Data Security & Pipeline Engineer **Sep 2020 – Sep 2021 | Plano, TX**

- Biometric Data Pipeline & Encryption Governance:** Engineered and audited high-volume sensitive biometric capture and ingestion pipelines for federal and enterprise clients, enforcing strict encryption, RBAC, and compliance standards while improving ingestion throughput by 25%.

EDUCATION

COLUMBIA UNIVERSITY — B.S. in Computer Science (Incoming Transfer Candidate, Spring 2027) **New York, NY**
UNIVERSITY OF TEXAS AT DALLAS — Computer Science & Distributed Systems (Data Structures, Algorithms, OS, DB Design) **Dallas, TX**
TARRANT COUNTY COLLEGE — Associate of Arts (Computer Science & Mathematics Track) **Fort Worth, TX**
