JAYSON QUINDAO

SYSTEMS & RUST ENGINEER • APPLIED AI & CLOUD ARCHITECT

Dallas-Fort Worth Metroplex (Plano Local) • (469) 371-8556 • jquindao1@icloud.com
Portfolio: jaysonquindao-com.pages.dev • GitHub: github.com/djjrip • LinkedIn: linkedin.com/in/jaysonquindao • U.S. Citizen

PROFESSIONAL SUMMARY

Systems Software Engineer and Founder with deep experience building lightweight, zero-overhead OS-level libraries in Rust, real-time telemetry streaming pipelines, and containerized cloud backends on AWS. Architected and deployed GG Loop from scratch, authoring the open-source Rust telemetry SDK (anti-cheat-sdk) and cross-platform desktop client utilizing native Win32/macOS process-scanning APIs (~5MB binary footprint). Built high-concurrency event ingestion via AWS Kinesis and WebSockets with sub-50ms latency. Proven enterprise track record at NCR Atleos in high-volume ATM settlement operations, managing multi-million-dollar cash flows, deposit fee configurations, and monthly institutional payouts. Local to Plano / DFW with immediate hybrid availability.

TECHNICAL COMPETENCIES

• **Languages & Core Systems:** Rust (Edition 2021, Cargo, Tokio, Serde, FFI / C-ABI, Unsafe Rust Boundaries, RAII, Multithreading, Crossbeam), C/C++, TypeScript, Node.js (ESNext), Python (Pandas, NumPy, FastAPI), SQL, Bash/Shell.
• **Embedded, OS & Streaming:** In-Vehicle & Desktop Telemetry Pipelines, OS Process Memory Scanning (Win32 K32EnumProcesses, OpenProcess), POSIX Calls, IPC, WebSockets (Sub-50ms Streams), AWS Kinesis, TCP/UDP, Protobuf, Serde JSON.
• **Cloud Infrastructure & Architecture:** AWS (App Runner, ECS Fargate, Kinesis Data Streams, Lambda, RDS PostgreSQL, S3, EventBridge, CloudWatch), Docker, 45-Table PostgreSQL Schemas (Drizzle ORM, ACID Ledgers), Stripe Connect, RESTful APIs.
• **DevOps, CI/CD & Testing:** GitHub Actions Automated CI/CD, Cargo Test / Bench (9/9 Unit Tests Passing), Automated Truth Gates, Docker Containerization, Git, Agile/Scrum, Cryptographic Security (AES-256, HMAC-SHA256, SHA-256).

PROFESSIONAL EXPERIENCE

GG LOOP LLC — Founder & Chief Systems Architect

Nov 2023 – Present | Dallas, TX / Remote

Stack: Rust, Tokio, Cargo, Tauri, AWS (App Runner, Kinesis, RDS), TypeScript, Drizzle ORM, GitHub Actions (ggloop.io)

• **Open-Source Rust Telemetry SDK (github.com/djjrip/anti-cheat-sdk):** Architected and shipped a production-grade, zero-overhead telemetry SDK in Rust (2021 edition) utilizing OS-level handles and process enumeration to monitor live system states with zero memory leaks and 100% cargo test pass rates.
• **Native Desktop Client & Process Watchdog (Tauri / Rust):** Engineered a cross-platform desktop client in Rust and Tauri with a minimal ~5MB binary footprint, utilizing Win32 APIs (K32EnumProcesses, OpenProcess) to verify process memory integrity and active window focus in real time.
• **High-Concurrency Event Telemetry Streaming:** Architected real-time event telemetry ingestion system using AWS Kinesis Data Streams, AWS Lambda, and WebSockets, processing thousands of concurrent user state streams with sub-50ms latency and zero dropped events.
• **Cryptographic Packet Verification & Data Integrity:** Engineered real-time payload verification generating HMAC-SHA256 signatures for telemetry packets, preventing replay attacks and stream tampering.
• **Production Database & Containerized Cloud:** Designed and deployed a 45-table PostgreSQL database schema on AWS RDS using Drizzle ORM; automated containerized deployments via Docker on AWS App Runner with zero-downtime rolling updates.
• **Automated CI/CD Workflows:** Authored end-to-end GitHub Actions pipelines with cross-compilation for Windows and macOS, automated truth gates, linting, and regression suites.

NCR ATLEOS — Finance Associate II — ATM Settlement Operations

Aug 2021 – Nov 2023 | Frisco, TX

Stack: ATM Network Settlement Systems, Fee Analysis, Cash Management, Ledger Reconciliation

• **National ATM Cash Settlement Management:** Managed monthly cash settlement payouts, statements, and bank routing configurations across national ATM banking networks, ensuring zero-downtime cash settlement across financial partners.
• **Deposit Fee & Interchange Analysis:** Audited and analyzed high-volume multi-million-dollar daily transaction settlement histories, structuring ATM deposit fee configurations and merchant account reconciliations.
• **Discrepancy Investigation & Compliance:** Investigated settlement exceptions, variances, and transaction discrepancies in close coordination with senior IT analysts (such as Vanessa Arrington) to maintain 99.9%+ balance sheet consistency.

MENTALIX, INC. — Data Specialist & Systems Pipeline Support

Sep 2022 – Sep 2023 | Plano, TX

Stack: Data Integrity Workflows, Hardware Scanning Interfacing, AES-256 Security Standards, CJIS Compliance

• **High-Integrity Data Management in Plano, TX:** Managed and structured large volumes of high-security biometric and hardware capture data, maintaining the highest standards of data integrity and confidentiality for enterprise and federal clients.
• **Workflow Optimization & Verification:** Optimized database ingestion workflows and proactively resolved data discrepancies under strict time constraints, ensuring 100% compliance with CJIS and enterprise privacy regulations.

EDUCATION & COMPLIANCE

TARRANT COUNTY COLLEGE — Associate of Arts (AA) • Core STEM & Transfer Curriculum

Fort Worth, TX

Advanced coursework in Physics, Computer Science, and Data Communications (UT Dallas & UT Arlington). U.S. Citizen • ITAR Compliant • Hybrid in Plano, TX.
