

JAYSON QUINDAO

PRINCIPAL SYSTEMS ARCHITECT • FOUNDING AI / FULL-STACK & RUST TELEMETRY ENGINEER

Dallas, TX • (469) 371-8556 • jquindao1@icloud.com • github.com/djjrip • djrip.github.io • U.S. Citizen (ITAR Eligible)

EXECUTIVE ENGINEERING PROFILE

6+ years engineering high-throughput distributed systems, userspace security telemetry SDKs in Rust/C++, full-stack TypeScript/Next.js platforms, autonomous LLM/MCP agent pipelines, and automated financial settlement engines. Founder & Principal Systems Architect of GG Loop LLC (shipped open-source Rust telemetry SDK, sub-50ms WebSocket streams, and PostgreSQL double-entry financial ledger). Former Financial Systems & Data Automation Engineer at NCR Atleos (automated multi-currency reconciliation across national ATM banking networks, cutting settlement discrepancy cycle times by 40%). U.S. Citizen with full defense, aerospace, and ITAR compliance eligibility.

CORE TECHNICAL COMPETENCIES

- **Systems, Security & Telemetry:** Rust (Cargo, Win32 Process/Memory Inspection, SHA-256 Hashing, HMAC-SHA256 Signing), C++, Electron.js, WebSockets (Sub-50ms Low-Latency Streams), AWS Kinesis, Network Socket Protocols.
- **Full-Stack & Cloud Infrastructure:** TypeScript, React, Next.js, Node.js, Python (FastAPI, Pandas, NumPy), PostgreSQL (Drizzle ORM, Batch Unnest Ingestion, ACID Ledgers), Docker, AWS (ECS Fargate, Lambda, RDS, S3), GitHub Actions CI/CD.
- **Applied AI & Agentic Orchestration:** Model Context Protocol (MCP) Servers, Multi-Agent Autonomous Systems, Claude / OpenAI / Gemini APIs, Structured Output Enforcement, RAG Architectures (pgvector), Headless Browser Automation (Playwright).
- **FinTech & Operational Ledgers:** Double-Entry PostgreSQL Ledgers, Stripe Connect Multi-Party Payouts, Idempotent Webhook Replay Protection, ATM Network Interbank Settlement & Reconciliation Engines.

PROFESSIONAL ENGINEERING EXPERIENCE

GG LOOP LLC — Founder & Principal Systems Architect Nov 2023 – Present | Dallas, TX / Remote

- Stack: Rust, TypeScript, Next.js, React, Node.js, PostgreSQL (Drizzle), AWS, Stripe Connect, MCP, WebSockets • github.com/djjrip/anti-cheat-sdk*
- **Open-Source Rust Telemetry SDK (anti-cheat-sdk):** Engineered a lightweight userspace security and telemetry library in Rust featuring Win32 memory enumeration (K32GetModuleFileNameExW), SHA-256 executable integrity hashing, and HMAC-SHA256 cryptographic packet signing.
 - **High-Throughput Telemetry Ingestion API:** Architected multi-tenant REST and WebSocket endpoints (/api/v1/ingest) utilizing single-roundtrip PostgreSQL unnest() bulk ingestion and automated anomaly rules flagging input variance under 2ms.
 - **Double-Entry Financial Ledger Platform:** Built competitive tournament infrastructure (gg-loop-tournament.vercel.app) featuring ACID double-entry ledgers, automated Stripe Connect multi-party settlement, and cryptographic replay verification.
 - **Autonomous Agentic Architecture:** Implemented Model Context Protocol (MCP) servers and autonomous background worker daemons handling real-time telemetry processing, pipeline deployment, and verified operations.

NCR ATLEOS (Formerly NCR Corp) — Financial Systems & Data Automation Engineer Aug 2021 – Nov 2023 | Frisco, TX

- Stack: Python (Pandas, NumPy), SQL (PostgreSQL, T-SQL), Automated ETL Pipelines, Interbank Settlement Systems*
- **Automated Financial Reconciliation:** Deployed automated Python and SQL ETL pipelines reconciling multi-million-dollar daily transaction flows across national ATM banking networks with 99.9%+ ledger consistency.
 - **40% Discrepancy Cycle-Time Slashing:** Engineered automated anomaly-detection scripts in SQL and Python, cutting transaction discrepancy investigation and dispute resolution turnaround times by 40%.
 - **National Interbank Settlement Operations:** Maintained automated cash payout routines and managed multi-tenant routing parameters across 80+ financial institutional partners.

MENTALIX, INC. — Data Security & Pipeline Engineer Sep 2020 – Sep 2021 | Plano, TX

- **Biometric Data Pipeline & Encryption Governance:** Built high-volume biometric capture and ingestion pipelines for enterprise and government agencies, enforcing strict AES-256 encryption, RBAC, and CJIS compliance standards while accelerating throughput by 25%.

EDUCATION

UNIVERSITY OF TEXAS AT ARLINGTON — Bachelor of Arts in Communication (Broadcasting) Arlington, TX

Coursework in Media Technology, Broadcast Telemetry, Digital Communications • 73 Credits Transferred from TCC

TARRANT COUNTY COLLEGE — Associate of Arts (Core Curriculum & Transfer Track) Fort Worth, TX
